- KUBERNETES
- VPC
- ANSIBLE
- GRAFANA

LANGUAGES

- English
- HINDI

PROFESSIONAL EXPERIENCE

- I have 5 years of experience as an Application Support Engineer on a government project. Over time, I built a strong interest in DevOps and have been learning and practicing its concepts through self-projects and training, including Git, scripting, CI/CD fundamentals, Docker, and cloud basics. I aim to start my career as a DevOps Engineer, where I can use my technical foundation, problem-solving ability, and growing DevOps knowledge to support automation, deployments, and modern software delivery processes.

WORK EXPERIENCE

APPLICATION SUPPORT ENGINEER

Corporate infotech private ltd

Duration: June 2023 – Aug2025
